ELSEVIER

Nuclear Engineering and Design 167 (1997) 399–400

Nuclear Engineering and Design

Subject Index of Volume 167

Thermal and fluid design

Modelling of void formation in the subcooled boiling regime in the ATHLET code to simulate flow instability for research reactors
A. Hainoun, E. Hicken, J. Wolters 167 (1997) 175

Engineering mechanics

Time and frequency domain analyses of single-degree-of-freedom systems
Ajaya K. Gupta, Tasnim Hassan, Abhinav Gupta 167 (1997) 1

J integral estimation fracture analysis for circumferentially cracked carbon steel piping
H. Xu, P.N. Li, Y.J. Xie, Z.W. Wang 167 (1997) 7

Analysis of the effect of interaction between shear and bending loads on the buckling strength of cylindrical shells
Kazuyuki Tsukimori 167 (1997) 23

Statistical models for estimating fatigue strain–life behavior of pressure boundary materials in light water reactor environments
J.M. Keisler, O.K. Chopra, W.J. Shack 167 (1997) 129

Materials properties

J integral estimation fracture analysis for circumferentially cracked carbon steel piping
H. Xu, P.N. Li, Y.J. Xie, Z.W. Wang 167 (1997) 7

Statistical models for estimating fatigue strain–life behavior of pressure boundary materials in light water reactor environments
J.M. Keisler, O.K. Chopra, W.J. Shack 167 (1997) 129

Effect of lead on Inconel 600 and Incoloy 800 oxide layers formed in simulated steam generator secondary environments
M. García-Mazario, A.M. Lancha, M. Hernández, C. Maffiotte 167 (1997) 155

Application of positron annihilation lineshape analysis to fatigue damage for nuclear plant materials
N. Maeda, N. Nakamura, M. Uchida, Y. Ohta, K. Yoshida 167 (1997) 169

Mechanical design, component fabrication and testing

Measurement of the yield and tensile strengths of neutron-irradiated and post-irradiation recovered vessel steels with notched specimens
A. Valiente, J. Lapeña 167 (1997) 11

Effects of off-centered cracks and restraint of induced bending caused by pressure on the crack-opening-area analysis of pipes
S. Rahman, N. Ghadiali, G.M. Wil-kowski, N. Bonora 167 (1997) 55

Fundamental study on applications of damage mechanics to evaluation of material degradation
Noriyoshi Maeda, Takayuki Watanabe, Michiaki Yoshino, Wen wei Gu 167 (1997) 69

Application of positron annihilation lineshape analysis to fatigue damage for nuclear plant materials
N. Maeda, N. Nakamura, M. Uchida, Y. Ohta, K. Yoshida 167 (1997) 169

Pressure vessel steel fracture toughness in the regime from room temperature to 400°C
A.A. Marengo, J.E.P. Ipiña 167 (1997) 215

Combination coding control rod position-indicating system
J. Yueyuan, W. Wenran, Y. Nianzu, L. Dezhong 167 (1997) 223

Reactor concepts and systems analysis

Status of the small modular fluidized bed light water nuclear reactor concept
F. Sefidvash 167 (1997) 203

System control and controls

Guidelines for computerized presentation of emergency operating procedures
Y. Niwa, E. Hollnagel, M. Green 167 (1997) 113
Staff training program of CANDU nuclear projects in Saskatoon
J. Huterer 167 (1997) 229

Nuclear waste management and disposal

Decontamination of the reactor coolant pump in Maanshan nuclear power plant
Iuan-Jou Yang, Mao-Ying Teng, Wu-Ing Huan, Yuan-Lung Sun 167 (1997) 91

Core physics and fuel design

Conversion of high enriched uranium in thorium-232-based oxide fuel for light and heavy water reactors: MOX-T fuel
E.I. Vapirev, V.I. Dimitrov, T.J. Jordanov, I.D. Christoskov 167 (1997) 105
Status of the small modular fluidized bed light water nuclear reactor concept
F. Sefidvash 167 (1997) 203

Nuclear safety

Simple method for risk assessment of nuclear power plant refueling outages
R.J. Rohrer, C.F. Nierode 167 (1997) 193

Thermal-hydraulics and safety

Probabilistic fire analysis capabilities, applications and weak points
P. Fernandez 167 (1997) 77
Reliability of systems subject to common-cause hazards assumed to obey an exponential power model
M.A. El-Damcese 167 (1997) 85
Engineering the development of Optical Fiber Sensors for adverse environments
M.C. Hastings, B. Chiu, D.W. Nippa 167 (1996) 239
Evaluating 'new' instrumentation and control technologies for safety-related applications in nuclear power plants
K. Korsah, C. Antonescu 167 (1997) 251
Results of examinations of pressure vessel samples and instrument nozzles from the TMI-2 lower head
G.E. Korth, D.R. Diercks, L.A. Neimark 167 (1997) 267
Interpretation of the results of the CORA-33 dry core boiling water reactor
L.J. Ott, S. Hagen 167 (1997) 287
Analysis of chaotic instabilities in boiling systems
C.-J. Chang, R.T. Lahey Jr. 167 (1997) 307
Simulation of the pressure set-point change transient with the Kuosheng plant analyzer
S.-J. Wang, S.-H. Chang, C.-S. Chien, S.-C. Jeng 167 (1997) 335
Application of a self-organizing fuzzy logic controller to nuclear steam generator level control
G.Y. Park, P.H. Seong 167 (1997) 345
IIST and LSTF counterpart test on PWR station blackout transient
T.-J. Liu, C.-H. Lee, Y.-S. Way 167 (1997) 357
Advanced fuel elements for passive pressure tube light water reactors
P. Hejzlar, B.T. Mattingly, N.E. Todreas, M.J. Driscoll 167 (1997) 375
